---

# Meet Your Instructor

- *College Drop-Out*
- *iOS Engineer for 4+ years*
- *Taught iOS Development @ Make School in SV*
- *Core Development Evangelist for Verizon Digital Media Services*
- *Member of the hackathon community*
- *Founder of TechniGal LA meetup*
- *Starting a Youtube Channel #TechTalkWithTJ*
- *Love, love, love to build cool stuff!!*

- **Auto Layout**
- **Core Data**

# Anatomy of iOS

# What's in iOS?

## Core OS

OSX Kernel    Power Management

Mach 3.0    Keychain Access

BSD    Certificates

Sockets    File System

Security    Bonjour

# What's in iOS?

## Core Services

Collections	Core Location
Address Book	Net Services
Networking	Threading
File Access	Preferences
SQLite	URL Utilities

# What's in iOS?

## Media

Core Audio	JPEG, PNG, TIFF
OpenAL	PDF
Audio Mixing	Quartz (2D)
Audio Recording	Core Animation
Video Playback	OpenGL ES

# Playgrounds

# XCode

# Intro to Swift

## (the basics)

# Data Types

- **String** - A group of unicode characters
  - *"i love you. ", "Let's take a walk tomorrow!"*
- **Character (char)**- A single unicode character
  - *"U", "9", "k", "."*
- **Int** - An Integer, whole number
  - *71, 19, 3*
- **Double - Decimal, more precise**
  - *58.9, 84.41, 99.990000000*
- **Float - Decimal, less precise**
  - *58.9, 84.41, 99.9900*
- **Bool** - Boolean
  - *true, false*

## ... Continued

- **Nil** - Non-existence, null

# Constants and Variables

## Constant

A value that cannot change.

**let**

## Variable

A value that can change.

**var**

# Optionals ?!

Checks for and protects values when compiling.

**(See Playground for examples)**

# Arrays [ ]

A group of values of a single type.

- *.isEmpty*
- *.count*
- *.append*
- *.insert*

# Functions

## **Functions ... do stuff!**

Contained pieces of code that perform specific tasks.

Give a function a name that identifies its purpose. This name is “called” when it’s time to perform its task.

**Let's Build!**

***To Swift and Beyond!!!***

# What's Next?

- Design Principles
- Building an app using an API
- Learning about The App Store/Becoming an Apple Dev

# Well Done!

# Hasta Luego Folks!

## **PART II**

# What we Went Over Last Time

- Anatomy of iOS
- XCode 8
- Intro to Swift
- Playgrounds
- “Hello World!” - Your First App!

# What's Next?

- Design Principles
- Building an app using an API
- Learning about The App Store/Becoming an Apple Dev

# Design Principles (MVC)

# Controller

How your app is  
displayed (UI).

# Model

What your app  
is/consists of.

# View

Components used by  
the **controller** to do  
it's job.

# APIs

# What's an API?

(Application Programming Interface)

A set of requirements that govern how one application can talk to another.

Gateway to request and receive data between applications.
